

1) What is the syntax to create a grid of 3 columns of 50 pixels and 2 rows of 25 pixels each?

- a) `.grid > div {display: -ms-grid; -ms-grid-columns: 50px, 50px, 50px; -ms-grid-rows: 25px, 25px;}`
- b) `.grid > div {display: -ms-grid; -ms-grid-columns: 50px 50px 50px; -ms-grid-rows: 25px 25px;}`
- c) `.grid > div {display: -ms-grid; -ms-grid-columns: 50px; 50px; 50px; -ms-grid-rows: 25px; 25px;}`

2) The default alignment of a grid cell is stretch

True / False

3) The outcome of the following code snippet is:

```
#id01 {  
  position : absolute;  
  top    : 30px;  
  left   : 25px;  
}
```

Object id01 will be placed 30 pixels from top and 25 pixels from the left from where it would be in the normal flow.

True / False

4) Grid allow the power of tables but controlled through css

True / False

- 1) b
- 2) true
- 3) false
- 4) true
